Bob Lenox

Discussion Summary	Meeting Minutes accepted with several action items carried over. Bob made the motion, John seconded. Passed unanimously. Brush truck has been requested and will be in Nelson today or tomorrow. It is in mint condition &	
	Will be inspected. Seabrook used the truck until they could purchase a new truck and then returned it to the Forestry Department. There was discussion about whether to paint the truck and duplication of vehicles. Jason found that Bellview is out of business. He did find a company in Swanzezy that can hopefully give us a second quote on the radio for the tanker truck. Bob shared with the committee that we were accepted for the second round of the federal grant for the tanker truck, but unfortunately because our SAM's number was incorrect we were disqualified. The federal grants will be opened early this year in late August or early September. Reminder this grant has a 30 day window to complete. There was a discussion about how the grant will be input. Edie will do that, but Gary is confirming this for the next meeting. There was discussion about the fact that the windows for entering in the grant information are not all known prior to filling in the information and this could cause Edie to have to call the committee to get information we did not know was needed.
